Management of Municipal Solid waste

3. Municipal Solid Waste Management:— The SADA shall establish or use an integrated Solid Waste Management (SWM) system with an aim to reduce the amount of waste being disposed, while maximizing resources recovery and efficiency. The preferred waste management system shall focus on the following points, namely: —

I. **Reduction and reuse at source:** The most preferred option for Solid Waste Management shall be prevention of waste generation. It will be helpful in reducing the handling, treatment, and disposal costs and specially reduce various environmental impacts such as leach ate, air emissions and generation of greenhouse gases.

II. **Waste recycling:** Recovery of recyclable material resources through a process of segregation, collection and re-processing to create new products shall be the next preferred alternative.

III. **Composting:** As far as possible the organic fraction of waste shall be composted and used to improve soil health and agricultural production adhering to norms.

IV. **Waste-to-Energy:** Where material recovery from waste is not possible, energy recovery from waste through production of heat, electricity or fuel may be preferred. Bio-methnation, waste incineration, production of Refuse Derived Fuel (RDF) and co-processing of the sorted dry rejects from municipal solid waste are to be commonly adopted “Waste to Energy” technologies.

V. **Waste disposal:** Remaining residual waste, which ideally comprises of inerts, shall be disposed in sanitary landfills constructed in accordance with stipulations of the Solid Waste Management Rules, 2016.

VI. The Integrated Solid Waste Management system shall be environment friendly. Waste minimization, waste recycling, waste-to-energy strategies and landfill gas capture and use which are promoted in the Solid Waste Management Rules, 2016 shall be adopted for reduction of greenhouse gases.

Chapter–III
Municipal Solid Waste Collection & Transportation

handover segregated wastes to authorised waste pickers or waste collectors designated by SADA or Agency Hired by SADA once a day or at the frequency as decided by respective local body on the timing fixed by the service provider. Every citizen has to pay a fixed monthly rental for the services of door to door garbage collection.

(b) Waste generators shall be encouraged to segregate waste and store at source in three separate colour bins i.e. green- for bio-degradable waste, blue - for non-biodegradable, red- for domestic hazardous waste.

(c) All institutions with more than 5,000 sqm plot area shall, within one year from the date of notification of these Bye-laws and in partnership with the Special Area Development Authority ensure segregation of waste at source by the generators, facilitate collection of segregated waste in separate streams, handover recyclable material to either the authorised waste pickers or the authorised recyclers. The bio-degradable waste shall be processed, treated and disposed off through composting or bio-meth nation within the premises as far as possible. The residual waste shall be given to the waste collectors or agency as directed by the Special Area Development Authority. No person shall organise an event/party or gathering at any unlicensed place without intimating the Special Area Development Authority at least three working days in advance and they should take prior permission from District Administration submit the fee as decide by SADA and such person or the organiser of such event shall ensure segregation of waste at source and handing over of segregated waste to waste collector or agency as specified by the Special Area Development Authority.
